# CSEE COURSE OUTLINE

---

## Certified Stormshield Endpoint Expert (STOTR-CSEE)

### Introduction

This course enables the acquisition of advanced knowledge for administering and maintaining the Stormshield Endpoint Security (SES) solution in accordance with standard practice. Consisting of presentations and practical lab exercises, it will allow the trainee to master the deployment of dedicated tools in order to optimize control over peripheral devices, automate the process of implementing security policies and customize log management. This course lasts two days.

### Target audience

System and security administrators, project managers, and IT and support technicians who have obtained CSEA certification.

### Learning objectives

Trainees attend a classroom training session that incorporates both theory and practice.

Trainees are given a printed training book, composed of the theoretical course and the labs. In order to practice, they benefit from a complete technical environment.

Trainees will have access to all the training book's updates for 3 years on <https://institute.stormshield.eu>.

At the end of the course, trainees will know how to:

- Address issues relating to installation or production
- Collect and analyze SES logs
- Implement advanced scripts that meet corporate needs
- Set up an enrollment policy for removable devices
- Collect diagnostic data that would be useful to SES support

### Venue, duration and registration

Stormshield offers training programs in France, Germany, Italy, Spain, Poland, Hungary, Norway, UK, UAE, APAC, Africa... Our instructors may also travel on-site to conduct training sessions if there are at least 5 trainees.

The Expert training course takes place over two consecutive days over 14 hours. Trainees are expected to turn up at 9.30 a.m. on the first day of training and at 9 a.m. the day after (unless otherwise indicated by the instructor or Stormshield). All registration requests have to be sent to Stormshield's training department ([training@stormshield.eu](mailto:training@stormshield.eu)) or to a distributor "Stormshield training center" (STC). The maximum class size is 8 trainees per session.

# STORMSHIELD

## Price

The price is 1600€ for two days of classroom training and two attempts at the on-line exam.

## Requirements

Knowledge of Windows client/server systems.

Knowledge of script languages that can be interpreted by Windows is a bonus.

## Hardware

Trainees are required to bring their own computer with these prerequisites:

-I5 64bit processor with Virtualization support

-at least 8Go of Ram

-80Go of free space on hard drive

-Windows Vista 64bit or higher

-Admin Rights to install virtualization software and Stormshield software

## Detailed description

### Day 1

- Repairing the installation of the server and SES agents
- Best practices
- Configuration of log management
- How to conduct a pre-production test
- Advanced security policies

### Day 2

- SES script remediation scenarios
- Advantages of third-party script languages
- Execution control on removable devices
- Enrollment of removable devices
- Management of incidents and resolution in liaison with SES support

## Certification exam

Certification consists of an exam carried out online (1 hour 10 minutes, 50 questions).

The minimum score required in order to obtain the certification is 70%.

Access to the exam will automatically be opened the day after the end of the course on the <https://institute.stormshield.eu> platform and will remain opened for three weeks. If the trainee fails his first attempt at the exam, or if he did not take it within the stipulated period, the second and last attempt will automatically open for an additional week.
