

# Endpoint Security Monitoring Review

## January - June 2017

### Vulnerabilities analyzed by Stormshield

These vulnerabilities affect some of the most common software products, present on the vast majority of computers.

### Blocked proactively by SES

Stormshield SES proactively blocked most vulnerability exploits.

When vulnerabilities are not blocked proactively, SES issues a report recommending adjustments to system policies.

#### Known\* & critical exploits

Stormshield SES blocked 100% of critical attacks containing known exploits.

\*'known' refers to exploits that have actually been observed

#### Critical exploits

EVEN IF these vulnerabilities were not all exploited, SES would block 99.5% of exploits of critical vulnerabilities, and the remaining 0.5% would be covered by security reports provided by Stormshield.

#### Malware

SES ALSO blocks malware that do not necessarily exploit a vulnerability. e.g.: Petya.B and Locky ransomware, Dridex attacks, Cryptolocker, Cryptowall and Teslacrypt.

**STORMSHIELD**

[WWW.STORMSHIELD.COM](http://WWW.STORMSHIELD.COM)

Stormshield, a fully-owned subsidiary of Airbus Defence and Space, offers innovative end-to-end security solutions to protect networks (Stormshield Network Security), computers (Stormshield Endpoint Security) and data (Stormshield Data Security).
